

October 7, 2020

Dear Parents,

We have just been informed by Aramark that one of its employees on the Moatfield Campus has tested positive for Covid-19. This person was screened daily, wore PPE as directed including mask, face shield and gloves. They have been away from campus since October 2<sup>nd</sup>. Aramark has reported this to Toronto Public Health as has Bayview Glen.

Out of an abundance caution and to protect the safety and well being of all our students and staff, all students on the Moatfield Campus will learn online for the next two days. This will permit Toronto Public Health to complete its contact tracing and advise the school. We do not want to run the risk of any community spread.

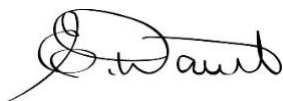

Again, please continue to monitor your children for any symptoms.

This occurrence in no way affects the school life in the Lower School as Aramark has a dedicated and independent team on each campus. All Lower School students will be at school tomorrow except Grade 5.

We realize that this information causes concern but know that Bayview Glen is working closely not just with you our parents but also with Toronto Public Health. We will keep you updated as information becomes available.

We look forward to a positive outcome for everyone involved.

Yours Sincerely,

Eileen Daunt  
Head of School
